

JOSEPH RIGAL

0769227034 | JORIGAL56@GMAIL.COM | [LINKEDIN](#)

Student at Central Lyon Engineering school, seeking a job starting in November 2026 to begin my career in robotics.

EDUCATION AND QUALIFICATIONS

CENTRAL LYON ENGINEERING SCHOOL, PGE 2023 -2026

- Automation Master – Specialisation in ML and vision model

PREPARATORY CLASSES (CPGE) – LYCÉE CHAMPOLLION, 2021-2023

- MPI – MP*

RELEVANT WORK EXPERIENCE

R&D Intern , Wormsensing, Grenoble, 6 month, 2026

- Pioneered a proof of concept for non-visual robotic perception: integrated a "dragonfly" vibration sensor into LeRobot and routed live spectrograms as "hacked camera" inputs, training robots to identify objects hidden inside opaque boxes tasks impossible with standard cameras.

Data scientist Intern, Probayes, Grenoble, 3 month, 2025

- Engineered a 10× speed-up in PDF-to-Markdown conversion for DocParser by profiling and optimising the critical bottlenecks in a deep-learning document-layout-analysis pipeline.

Private math Tutor, Institut Fibonnaci, Lyon, 3 years, 2024-2026

- Lycée du Parc, CHampollion MPSI (Mathematics, Physics).

Assembly line intern, Elistair, Lyon, 4 weeks, 2023

- Assembling of Tethered Drones.

EXTRA CURRICULAR ACTIVITIES AND POSITIONS OF RESPONSIBILITY

HACKATHON WINNER :

- Won the 2026 Paris Builds x YC Hackathon to win a YC interview (robotics Track). We built an external runtime safety layer for learning-based robots. VIGIE watches the robot and its workspace through environment cameras, detects dangerous situations, and can pause, hold and resume. Built in 36 hours with a live demo harness interfaced with LeRobot.
- 3rd at the Go-Sim robotics hackathon on Open-Arms.

LEJUNIOR END TO END PICK AND PLACE PIPELINE

- Directing a VLA while hacking the camera by drawing on the camera feed with instruction of the placement of the objects (allows to fill full boxes osith sorted with a simple pi05 model), It allows long task completion with a sort of visual prompt injection.
- Part of a Start-up launch [Vlastir robotics](#) to automate long pick and place fro little SMEs, currently in the second round of Central Start'up challenge.

SCOUTING, 2023 - 2025

- Leader of a scout troop of 32 young people aged 12 to 17.

MECATRONICS SKILLS

DEV SKILLS

DEV TOOLS

LANGUAGES

SOCIALS

KiKAD, FreeCAD, SOLIDWORKS,

Python, (PyTorch, Lerobot), C++

VS Code, Git

French Native – English, 99/120 TOEFL
